

# THE ROUTE TO EFFICIENT TRANSPORTATION MANAGEMENT

## DATA SHEET

The ground transportation industry operates in a highly competitive business environment.

With costs always going up and margins always getting squeezed companies know it is imperative for them to improve the efficiency of job reservation, scheduling and dispatching operations – to provide unique products and services that meet customer needs offering exceptional service, while driving down costs to satisfy stakeholders, and to enhance financial performance.

Only integrated processes and advanced business systems, allied with industry-specific business applications, can provide the efficiency required to meet all stakeholder expectations. Unified Software is able to provide the integrated solutions needed – covering job reservation, scheduling, manual and automated dispatching operations, e-business architecture and back office data management.

Unified Software delivers feature-packed yet affordable software applications that are simple, flexible, and comprehensive. Our applications deliver scalability, performance and manageability, while enabling easy integration with existing resources, application and infrastructure.

Out of the box and installed, our applications provide users with numerous functions, such as job reservation, computer aided scheduling, manual and automated dispatching, management reporting and many back office tasks and more. Systems administrators are given the tools to define drivers, passengers, systems user groups and individual users with their access control policies, install and manage client applications, and remotely monitor and administer the system.

Above all, the solution provides the business and operational intelligence needed for optimal performance – based on integrated data flows with visibility of key financial dimensions, to control risk and provide accountability to stakeholders.

### INNOVATION

We aspire to be innovative in our approach to business and in our product functionality, informed by continually increasing knowledge of the system users, the market, and new technological opportunities.

### INDEPENDENCE

Our software is independent in its ability to support the widest choice of MDT's. Our customers are free to choose their own computer hardware as well as the MDT models and software package levels. Unified Software as a company has kept itself financially sound without investor and venture capital pressures. Our employees have independence in their work and in their thinking; our entrepreneurial spirit attracts professionals who take initiatives and make things happen.

### FLEXIBILITY

Flexibility is the key to responsiveness as time progresses and situations change, as well as to our products' usability and being 'future-proof', including the ability to scale your system for future needs.

FREE TRIAL FOR 30 DAYS

With next generation products available today, and innovative solutions tomorrow, we bring the finest, most robust open system technology available today. All engineered to execute your business objectives.

Our software is available in a range of core offerings that give you the freedom to choose what is right for you now - and to upgrade as your needs grow in future. We deliver feature packed software applications that are simple, flexible, and comprehensive, it drives rapid user adoption and productivity and provides quick time to value while supporting your strategic technology initiative.

### **BARRACUDA** Complete Solution for Shuttle and Transit Operations.

The Unified Software **BARRACUDA** System is a powerful enterprise-wide solution for managing the complex and dynamic operating conditions of demand-response transportation. **BARRACUDA** supports a door-to door Airport Shuttle and paratransit services in a shared or single ride mode.

### **SALARIAS** Solution for Taxi Operations

Rich in innovative features and functionality that deliver competitive advantages, **SALARIAS** offers dispatchers, drivers and control room personnel with communication power, scheduling and dispatching flexibility and superior workload management tools.

## **SYSTEM PLATFORM**

### **SERVER**

#### **Hardware**

Dual Intel Pentium Xeon 3 GHZ processor  
RAM: 4 GB of DDR-2 SDRAM Memory  
Hard Drive: 2 X 36 GB 15K RPM U320 SCSI  
10 GB of free hard disk space

#### **Software**

Windows server 2003  
Windows 2000  
Windows NT  
Windows XP

### **CLIENT**

#### **Hardware**

Intel: Xeon 3.6GHz w/ 1MB Cache  
RAM: 2GB of ECC DDR Memory  
1900x1200 color screen resolution or higher  
10 GB of free hard disk space

#### **Software**

Windows 2000  
Windows NT  
Windows XP
