

SALARIAS

A COMPLETE SOLUTION FOR THE TAXI INDUSTRY

THE SOLUTION THAT EVOLVES WITH YOUR BUSINESS

SALARIAS is an enterprise level information system that brings together all activities into a single platform, offering comprehensive reporting, job reservation, scheduling, dispatching, billing and cashiering capabilities.

Rich in innovative features and functionality that deliver competitive advantages, SALARIAS offers dispatchers, drivers and control room personnel with communication power, scheduling and dispatching flexibility and superior workload management tools. The ease with which a company can implement SALARIAS and its robust feature set provide a unique value proposition for small and midsize companies seeking to reduce costs and increase efficiency without making a big capital investment.

SYSTEM FUNCTIONALITY

USER INTERFACE

SALARIAS uses Microsoft Windows as the basis for the systems look and feel. This means SALARIAS can be taught easily to anyone who has used Microsoft Windows, hence training overheads for SALARIAS users are minimal.

RESERVATIONS

SALARIAS is specially designed to be extremely functional and extremely easy to use. Your operators will find everything they need for entering and maintaining reservation information, right there on a single screen. No complex menus, no long progression of screens; just easy to learn and use functionality right there on the screen.

DISPATCHING

SALARIAS is a cutting edge solution that's fully integrated with Reservation and Scheduling, allowing for quick and easy assignment of reservations and specific trip management. The interface is extremely easy to use, with its point-and-click and drag-and-drop functionality. This means your staff can hit the ground running with SALARIAS – no need for lengthy or difficult training. You'll see productivity soar practically from the very start! If combined with Windows CE based Mobile Data Terminals SALARIAS supports a real-time automated dispatching. Unified Software's design philosophy toward open and standard architecture allows SALARIAS to interface with wide variety of MDT systems from multiple vendors.

SALARIAS AT A GLANCE

CALL MANAGEMENT

UNIFIED SOFTWARE ADVANTAGE

CUSTOMIZATION TO MEET YOUR INDIVIDUAL NEEDS

Every business is unique, and yours is no exception. Unified Software understands this, and that's why we specially designed SALARIAS to be easily configured for your specific needs. Whether you're interested in just a few new capabilities or a complete end-to-end solution, SALARIAS puts everything your business needs into one integrated package.

By researching current and future technologies and services, Unified Software and its partners ensure they remain at the forefront of developments, making the choice for transportation service providers easier. Through the implementation of tailor-made solutions, the program shortens time to implement and simplifies the preparation process prior to launch for service providers. Furthermore, it enables them to develop and sustain competitive advantage.

Our product portfolio will evolve as new technologies are introduced and applications developed, accelerating the delivery of a truly integrated package to our customers.

END-TO-END TECHNOLOGY

At Unified Software we maintain complete end-to-end development and management of our products and services. We market our industry-leading solutions, and provide our customers with complete training and ongoing technical support.

What does this mean for you? Our end-to-end approach reduces both the risk and cost to you, and creates the most flexible solutions for your business. We focus on integrating your technology strategy with your business strategy to produce the greatest benefit and value to your business.

RETURN ON INVESTMENT

SALARIAS adds maximum value to your business while maintaining an extremely low cost of ownership. Deployment, operation, and maintenance are straightforward, highly customizable, and fully supported by Unified Software experts.
